UPDATES FOR POSIGRIP OPERATORS WORLDWIDE

NEW LINE OF NANO-BASED PRODUCTS FOR COMMERCIAL AND RESIDENTIAL USE

PosiShield Antimicrobial coating creates an invisible barrier which inhibits the growth of bacteria and other microbes for pennies a square foot. It is effective against bacteria, fungi, viruses and algae.

When applied to a surface or fabric, PosiShield creates a matrix of positively charged spike like nano-molecules which bond strongly to the surface. Since bacteria, mold and fungi are negatively charged they are attracted to the antimicrobial layer where they are impaled on the spikes and receive an electrical shock resulting in a 100% kill ratio for all microbes which come

into contact. The antimicrobial agent stays intact and active through repeated use and exposure to microbes.

The benefits include:

- 24/7 continuous antimicrobial protection lasting up to 90 days on touch surfaces and permanent on untouched surfaces such as high walls and ceilings
- Environmentally friendly water based technology is non-toxic, hypoallergenic, and non-irritating to skin
- Invisible, odorless, and will not affect the appearance of the treated surface
- Meets OSHA standards, is EPA registered and USDA approved.

- Inhibits and controls microbes, gram+ & gram— bacteria, fungi, molds, yeast and algae. Reduces staining and odor and reduces routes of transfer.

Other nano products now available include Nano Power Finish, the nano treatment which protects all non-porous surfaces including metal, glass, plastics, stone and wood. Please visit <http://posishield.com/> for more information.

If you wish to participate in the Posishield Nano Program, please contact Corporate @ 1-800-662-9299 for more information.

POSIGRIP NATIONAL INSURANCE PROGRAM: GROUP LIABILITY

A National Program to provide Business Liability Insurance for Posigrip Operators underwritten by a 90 year old Fortune 500 Company is available.

The group insurance program will save you money and in most every case so far, provide the liability insurance that our corporate customers require at a rate you will not have otherwise been able to find. In some areas, as much as a 60% savings has been realized. If you have existing insurance and would like for our group agent to give you a quote, call Posigrip Corporate @ 800-662-9299 for details.

Famous Footwear

Posigrip is now in negotiation to renew its contract with The Brown Shoe Company and Famous Footwear stores. 573 locations nationwide !

It is recommended that your current insurance policies be submitted for approval as we are trying to have all insurance and operators in place once the agreements are signed.

Please submit them to the Daytona Beach Corporate office by mailing to:

825 Gatepark Dr., Suite 3
Daytona Beach, Florida 32114

COMPOSITE DECK TREATMENT PROGRAM

Posigrip/Posishield has been selected to participate in a National Program to provide remedial treatment for some 7,000 decks nationwide. These are composite decks that were manufactured without the necessary mold inhibitors and as a result of a class action lawsuit, the manufacturer and several large distributors such as Lowes have agreed to provide treatment to these decks.

To date the average operator has received 10 to 20 decks per location and the average size is 600 sq. ft. per deck. The charge is \$1 per square foot and invoices have been paid in approximately 12 business days after received.

If you would like to participate in the deck program call or contact Mario @ 800-662-9299
